

Make an animal tracker

Find out what has been out at night while you've been fast asleep!

- 1** Fill the tray with sand and smooth the surface with the edge of the plank or ruler.

- 2** Put a little pet food in the dish and stick it in the middle of the tray.

You will need

- Baking tray
- Small plank or long ruler
- Fine, damp sand
- Small shallow dish
- Dog or cat food

- 3** Leave your tracker out overnight and see the next day if anything has left its footprints there. Throw the pet food away in the morning, before it goes bad.
