During this difficult time of 'Government Lockdown' due to COVID-19, The RSPB Macclesfield Local Group invite you to participate in a Wildlife Survey of what you see / hear in your garden and surrounding area as well as overflying species. If you participate in the Garden Bird Survey (GBS) over the winter months then there will be some overlap for the birds. Please feel free to complete both surveys. We have added species to the list that we think may come to your garden while removing the winter visitors. Please add these species back if you have a winter 'long stayer' in your garden. The lists do not include all the species that you may see in your garden if something different or unusual turns up please add it to the appropriate sheet.

When complete (when we return to normal or in October when the next GBS starts whichever is the earlier) please return to Ian Taylor, 39 Leamington Road, Congleton, Cheshire, CW12 4PE. Scanned copies are welcome by email to newsletter@macclesfieldrspb.org.uk. The data will be collated and a report will be published in the Newsletter and the Website.

The Local Group Website has suspended the normal Wildlife Sightings section. However, we welcome on line reports and photographs to birdrecords@macclesfieldrspb.org.uk from your own gardens and areas that you can see from your house (addresses will not be published). This will allow us to monitor the arrival of our summer migrants. Please tell us of any other or unexpected sightings you find.
